

U.S. Small Business Administration

For 55 years, the US Small Business Administration, an agency of the federal government, has been a key resource for our Nation's small business owners.

If you are considering starting a small business or need capital to grow an existing business, the SBA has many products and services available to assist you.

The goal of the SBA is to help small businesses by providing them the tools they need to succeed. Whether you are starting a small business and need assistance to develop a business plan, create a budget, expand your business, and need additional training, technical assistance, access to capital, and more: SBA can help you.

This free workshop will help you gain a better understanding of the various SBA programs and services that are available to prospective or current entrepreneurs who need assistance in starting or expanding their businesses. There will also be a discussion on possible sources of capital for business.
